Logical Reasoning Practice & Puzzles

Seating Arrangements & Direction Sense

1. Seating Arrangement Strategies

- Linear Arrangements: Pay close attention to facing North vs. South.
- Circular Arrangements: Facing Center -> Clockwise is Left, Counter-Clockwise is Right.
- Facing Outward -> Clockwise is Right, Counter-Clockwise is Left.
- Always begin with definitive clues (e.g. 'P sits at the extreme left end').

2. Direction Sense Test Essentials

- Standard 4 cardinal directions (N, S, E, W) and 4 intermediate (NE, NW, SE, SW).
- Shadow at Sunrise: Shadow falls towards West.
- Shadow at Sunset: Shadow falls towards East. At 12 Noon, no shadow is cast directly.
- Use Pythagoras Theorem (a^2 + b^2 = c^2) to calculate shortest displacement.

Logical Reasoning Practice & Puzzles

Syllogisms & Analytical Deductions

3. Syllogism Venn Diagram Rules

- All A are B: Circle A is completely inside Circle B.
- Some A are B: Overlapping region exists between A and B.
- No A is B: Disjoint circles with no intersection.
- Either-Or Complementary Pairs: (Some + No) or (All + Some Not).

4. Blood Relations & Coded Hierarchy

- Representation: Male denoted by (+), Female denoted by (-), Married couple (=), Siblings (-).
- Generational hierarchy: Place grandparents at top tier, parents in middle, children at base.
- Coded Relations: Decode from right to left to establish immediate relationships.
